Establishment for the organization of the public Health Institute

From

The Commissioner in Mysore

No. 6483 / BHR 815 Dated 26.4.12 Received 30.4.12

Diary No. 6377	Enclos. 2 Spare Copies.	Serial No. /

BRIEF ABSTRACT OF LETTER.

Forwards letter from the Sanitary Commissioner submitting for sanction a provisional statement for additional establishment costing Rs. 3.81/- per mensem, for the public Health Institute.

NOTES AND ORDERS.

The Sanitary Commissioner proposes additional establishment for the public Health Laboratory and for the Vaccine Institute. The necessity for the additional establishment is stated in the explanatory memo. He also proposes the establishment of a public Health Museum

NOTES—First Sheet.

GPB—30,000—12-8-11

Serial No.

and the public Health Library.

The additional establishment proposed for the public Health Laboratory is as noted below:-

1 Head clerk	Rs 50/-
1 Typist	Rs 40/-
1 Clerk	Rs 30/-
1 Mechanic for the Refrigerating plant	Rs 30/-
2 Laboratory attendants (20+15)	Rs 35/-
2 orderlies at Rs 8/- each	16/-
Increase of pay to the existing 2 orderlies	2/
Increase of pay to the sweeper	1/-
Total increase	Rs 204/

The ~~additional~~ revised establishment proposed for the Vaccine Institute is as shown below:-

2 Assistant Superintendents in place of 2 Vaccinators on (60+40) (28+25) net excess	Rs 47/
3 watchmen (10, 8, 8)	Rs 26/
Total increase	73

Establishment for the Health Museum

1 Curator	Rs 50/-
2 attendants at Rs 8/ each	16/-

Establishment for the Health Library

1 Librarian	Rs 30/-
1 attendant	Rs 8/-
Increase per month	Rs 381

As the proposal involves permanent addition to the recurring expenditure Fr II has to be consulted. If the establishment proposed is sanctioned necessary provision has to be made in the ensuing years budget.

3. Submitted for orders.

2.5.12

4. It is hard to judge of the needs of a Dept like that of the Public Health Institute without an adequate knowledge of the details of the working thereof. The Sanitary Comr states that it is absolutely necessary to retain the Laboratory Apt in addition to Dr Krishnaswamy Iyengar, Apt to the Chemical Examiner and Bacteriologist. There is also another Sub Apt Surgeon employed in the Laboratory. There is only one clerk now on Rs 30, but it is proposed to have one Head Clerk on Rs 50 and two clerks on Rs 30 each.

NOTE—Contn. sheet.

GPB—20,000—20-1-12

Serial No.

and also a typist on Rs 40 in all 3. A mechanic is said to be required for the refrigerating plant and perhaps he is. The number of Laboratory attendants is proposed to be increased from 4 to 6 and the number of orderlies from 2 to 4, their pays also being revised. It is a question whether these increases are necessary. The pay of the sweeper is also proposed to be raised by one rupee, from Rs 6 to Rs 7.

5. In the Vaccine Institute there are at present two vaccinators on Rs 28 and Rs 25. It is proposed to have in their place two Apt Superintendents on Rs 60 and Rs 40. This is an important institution requiring the constant care and attention of the Superintendent himself as far as possible, in all the details in connection with the manufacture of vaccine lymph. Mr Harve is proposed to be transferred to the charge of this Institute. In these

General and Revenue Secretariat.

Sanitary File No. 121 of 1911-12

Serial No.

circumstances, it is for consideration whether it is necessary to have two highly paid Asst. Superintendents as proposed by the Sanitary Commr. The number of watchmen is proposed to be raised from 3 to 6

6. The pay of the Curator of the Govt. museum, a larger and more important institution than the Health museum, is Rs 50 only and it is therefore for consideration whether the pay of the Curator of the Public Health Museum need be Rs 50.

7. The pay of the proposed for the Librarian also seems capable of reduction -

Secy) 7. 5. 12. Mlle

8. When the head of the department describes the proposed estt as the "minimum compatible with efficiency" a layman is at a disadvantage in offering suggestions. A few are however put forward for what they are worth.

9. ~~If~~ ~~Set~~ A separate Curator

the museum & a separate libran
Deem to be unnecessary. These
two appointments may be held b
one person, and probably the
clerks sanctioned for the office
may be in charge of the muse
& the library. Rs will save 80 Rs
The two additional Lab^r attendan
may get 15 + 10 instead of 20+1
Rs will save 10 Rs.

~~The two~~ Of the clerks 2 may be on
80 Rs & 2 on 70 — saving 2 Rs.

In the vaccine branch the two
Asst Supts may get the same
pay as Vet^y Asst Inspectors.
(30 - 50) — saving about 15 Rs.
A saving of about 107 Rs per mo may be
effected by these economies.

G. R. S. 12]

General and Revenue Secretariat.

Sanction File No. 121 of 1911-12

Serial No.	
	13 The general question of the Public Health Department, as above, does not seem to have been noted on anywhere by the Financial Branch
	14 The Senior Surgeon lays great stress on the research work to be done in the Laboratory — apart from the ordinary work of chemical & bacteriological examination — and for this reason wants a large establishment, so as to give more time for the Supdt's research work (para 1 of the letter under disposal)... ~~It is doubtful if research work~~
	It is to be feared that the programme chalked out by him including the investigation of malaria, typhoid fever, Cholera, Sleeping sickness &c is much too ambitious for a small State like ours and that it can only be efficiently put in practice by bigger States — with greater resources and having numerous qualified experts able to carry on such work. Perhaps the utmost that we can do is to help

Institute ?

Research work

Research work must be left to such States &c

NOTE—Contn. sheet.

GPB—20,000—29-1-12

G. R. S. 12]

General and Revenue Secretariat.

Sanitary File No. 121 of 1911-12

Serial No.

Ourselves acquainted with the discoveries made elsewhere and put them into practice here. It is significant that in the Scheme of Organisation of the Sanitary Department proposed by Lt Col Drake Brockman & others more stress was laid on the Executive & Supervising Establishment (to introduce Sanitary measures) than on the laboratory research work.

15 Regarding the other work it may be noticed that in File No 132 of 1911 the Senior Surgeon recommends the immediate grant of a higher pay to Dr Srinivasa Rau on the ground that such pay was promised to be given when the work of the new Public Health Institute was begun and that as a matter of fact all the work pertaining to it was being actually done by him at that time. This means that by the formation of the new Public Health Institute there is no new work to be done — barring the Sanitary School — and it is therefore not clear why an increase in Establishment is considered necessary. On the other hand when the work of these officers is

NOTE—Contn. sheet.

GPB—20,000—20-1-12

General and Revenue Secretariat.

Sa. File No. 121 of 1911-12

Serial No.

amalgamated one would expect a reduction in establishment.

16 The Administrative Branch has pointed out some items which may be considered unnecessary. In addition, the following may also be considered as unnecessary

Laboratory Asstt. Considering the remarks made above regarding research work and the fact that there is in addition to the Asst Mr K.R. K Iyengar and one Sub Asstt Surgeon, this post may not be necessary.

17 Regarding the clerical staff, there is at present 1 clerk on 30 and it is proposed to have three more - As there is no increase of work this increase seems to be unnecessary. Perhaps one additional Clerk on 25 is all that is necessary

If the suggestion of the Administrative Branch, to do away with the Curator of the Museums & the Librarian are adopted, one more clerk may be allowed for this work.

It is not clear if a mechanic is necessary

NOTE—Contd. sheet.

GPB—20,003—20-1-12

General and Revenue Secretariat.

1137

for the refrigerating plant.

The increase proposed in the menial establishment appears to be capable of curtailment. In the Library and the Museum two attendants may suffice instead of three as proposed. Where the laboratory attendants are increased from four to six it may not be necessary to increase the number of orderlies also from 2 to 4.

Public Health Laboratory

27 The appointment of one clerk on Rs 25/- per mensem, in addition to the existing clerk on Rs 30/- per mensem, was suggested. The Sanitary Board in the modified proposal recommends sanction to the appointment of one clerk on Rs 50/- and a typist on Rs 30/- per mensem in addition to the above two clerks.

The appointment of a mechanic on Rs 30/- was stated to be not clear. ~~Considered Unnecessary~~. The necessity for the Sanitary Board states that a mechanic is absolutely necessary as no clerk or typist could be entrusted with the machinery. The pay proposed for the two additional Laboratory attendants was Rs ~~15 & 10~~ 15 and 10. The Sanitary Board in the modified proposal recommends Rs 15 and Rs 12 to each of the attendants. The appointment of two additional orderlies was considered unnecessary. The Sanitary Board now recommends the appointment of one more orderly as the duty of an orderly is different from that of Laboratory attendant.

28 Vaccine Institute

The Sanitary Board recommends that the pay of the two Assistant Superintendents proposed for the Vaccine Institute may be fixed at Rs 50 and 35/- instead of Rs 50 and 30/- as proposed by the office.

the formation of the Public Health Institute etc is more in the nature of consolidating the existing offices and that it cannot therefore involve a great increase in work or require much addition to the establishment.

34 The Sr Surgeon has not seen his way to accept most of the recommendations of the financial Branch — especially regarding the clerical establishment. It was suggested that in addition to the existing one clerk on 30, one clerk may be sanctd on 25 for increased clerical work and another to look after Museum & Library. He however wants 4 clerks on the Whole on pays 50, 50, 30, 25.

35 A mechanic being considered necessary may be allowed & on the other points Sr Surgeon's ~~recommendations~~ revised proposals may perhaps be appd.

297

be sanctioned. If the increase in work is really found after some experience to require a further addn to the estabt. such addition may be sanctioned later on. As work increases establishment may go on increasing; but if there be no sufficient work for a large establishment sanctioned all at once the reduction of establishment once entertained will be a difficult process.

37 The whole time of a mechanic can hardly be utilized on the refrigerating plant. The mechanic of the Central college laboratory or one of the men in the D.P.W. workshop – both places being within a stone's throw – may look after this plant for a small allowance.

38 Head clerk, Accountant, Despatching clerk, Typist, Curator, Librarian, Keeper of Records &c are no doubt different designations But considering the bulk of each kind of work which may be expected under ordinary circumstances in the institution three men seem quite ample for all these functions. In fact in my opinion the estabt as recast in the Secty letter of 5.8.12 may be regarded as fairly liberal for commencing the work of the reorganized institution & carrying on.

SIR,

With reference to para 3 of Government Proceedings No. 3525-7 Sany. 132-10-6 dated the 10th November 1911 according sanction to the organization of a Public Health Institute, I have the honor to append, for the information of Government a statement ~~of~~ outlining the work, relating Public Health, that is being done in the Chemical Laborat or would hereafter devolve on the Superintendent as a result of the formation of the Health Institute. The efforts of the sanitarian in combating ~~the~~ epidemic diseases should, if they are to lead to a successful issu be always supplemented and guided by the results obtained in the Laboratory. To give an example, the species and genera of mosquitoes, and the conditions if any, peculia to particular localities in the Province that favor their habitat, reproduction etc have to be determined before steps can be taken with any degree of success for the prevention of malaria. There is again the question of typ

and cholera carriers who without themselves showing any signs of disease are daily excreting these bacteria in millions thus endangering public health. Considering the facilities of intercourse between East Africa and India the possibility of the introduction of that dreaded disease- " sleeping sickness " has to be kept in view and investigations carried out as to whether the infective agent - Glossina Palpalis - is present among us here in Mysore. Many of the diseases of both human beings and animals are now recognized to be due to protozoa and their study is being wide-spread. Serum therapy, vaccine treatment of bacterial diseases and the etiology of indefinite fevers etc are some of the other subjects that offer numerous important themes for investigation.

It will thus be clear that if the Health Institute is to fulfill the objects for which its inauguration has been sanctioned by Government, the Head of the Institute should be relieved of as much as possible of daily routine work in the Laboratory, which even at present is very considerable and would be still more so in the near future. If adequate assistance is not given to the members of the superior staff their energies will be frittered away in attending to matters which can well be looked after by Laboratory Assistants and others, the result being that the Government will not get the proper return for the money they spend on the Institute. In the interests of efficiency and true economy therefore the entertainment of a suitable subordinate and clerical staff for the Public Health Institute is absolutely necessary.

An additional staff costing Rs. 434/- per mensem, as detailed in the accompanying proposition statement, is

is in my opinion the minimum compatible with efficiency. Explanatory notes are attached to the statement. I request that Government may be pleased to accord early sanction to the proposals so that work in the Institute may be started as soon as possible.

I have the honor to be,
Sir,
Your most obedient servant,

J. V. Acharekar

Sanitary Commissioner.

P.H.

Enclosure A.

List of items of work being done or has to done in the Public Health Laboratory.

---

1. Ordinary chemical work comprising amongst other items,

   The analysis of (a) waters,

   (b) sewage & sewage effluents,

   (c) filtering media,

   (d) intoxicating drugs viz., fermented liquors, spirits, opium, ganja etc.,

   (e) articles of food and drink including grains, milk, curds, butter, ghee, aerated waters etc.,

   (f) urine and urinary calculi.

2. Bacteriological work relating to Examination of

   (a) waters and foods for pathogenic germs,

   (b) blood, sputum and excreta for diagnostic purposes.

3. Work connected with public health and preparation of vaccines including determination of

   (a) wholesomeness or otherwise of foods and drinks.

   (b) adulteration of foods, drinks and drugs,

   (c) the efficacy of the small-pox vaccine,

   (d) ---- Do-----of disinfectants etc.,

   and (e) tracing of outbreaks of epidemic diseases.

4. Pathological work which includes section, cutting staining, mounting and the examination of specimens.

5. Vaccine Institute. There must be a special

special officer with D.P.H. qualification to conduct the work in the Institute.

6. Special classes for Medical Officers and Subordinates who attend the Laboratory for a course in Bacteriology.

7. Management of the Sanitary School.

8. Public Health Museum.

9. Public Health Library.

10. Touring in the Province to inspect vaccination, water supplies and to educate the people in Sanitary principles.

N.B. The duties outlined above are by no means exhaustive and will have to be supplemented as time and experience may dictate.

J. J. Anderson

Sanitary Commissioner.

P.H.

Explanatory Notes

Enclosure B.

The Public Health and Toxicological Laboratories.

To help the Superintendent in the Laboratory work ernment have already been pleased to give him an istant in the person of Dr. K.R. Krishnaswami Iyengar, to attend to the minor duties connected with the Laboratory routine, the entertainment of the Laboratory Assistant, provision for whom is made in the Sanitary Budget, is imperative. It is absolutely necessary that the Head of the Public Health Institute should be freed from much of the ordinary duties, in order that he may be able to devote sometime to research which forms an integral part of the work of the Institute.

Correspondence to the increase of work in the Public Health and Toxicological Laboratory section of the Institute there has been a considerable increase of writing work and it being far too heavy for a single clerk sanctioned nearly 14 years ago, makes demands on the time of the other members of the Laboratory staff. Now with the organization of the Public Health Institute the placing of the whole establishment on a proper basis becomes an obvious necessity.

As regards inferior Establishment a better stamp of men than those now employed, on a better pay, should be employed seeing that the Public Health Institute contains many valuable instruments which require to be kept clean and in proper condition.

The financial effect of the above proposal is that the monthly expenditure would be raised by only Rs. 204/- per mensem. The small increase of pay proposed in the case of the 2 orderlies and the sweeper is very necessary considering the enhanced cost of living at the

the present time.

The Vaccine Institute. For the efficient working of the Institute it is absolutely necessary to have persons with higher qualifications, both general and special, than those possessed by the existing 2 vaccinators. They must be able to understand the elementary principles of Bacteriology and Veterinary Science and apply them in practice. To have a highly paid Superintendent for the Vaccine Institute without providing him with reliable Assistants is so much money thrown away. Two Assistant Superintendents on Rs. 60/- and 40/- respectively should be entertained. The menial establishment is also insufficiently manned. The 3 watchmen at present employed are expected to be on duty both day and night, which, it is unnecessary to add, is physically impossible. The calves are not at all looked after at nights the result being that the vaccinated portions of the calves become contaminated with their excreta and the vesicles become purulent entailing the rejection of calves afterwards. The menial establishment should be increased by one head watchman and two others, on Rs. 10/-, 8 and 8 respectively.

The Public Health Museum and the Public Health Library.

The requirements for these are self evident and therefore call for no remarks.

H. V. Acharyulu

Sanitary Commissioner.

P.H.

No 4297
12.4.1909

Lt.Col.John Smyth, M.D.,I.M.S.,

K.S. Chandrasekhara Iyer Esq, B.A.,B.

With reference to your D.O. No.9574 dated the 2nd April 1909, I have the honor to submit for the information and orders of His Highness's Government and as a formal proposal the substance of my unofficial notes of 3rd December 1908 on your Office Sanitary file No.179-07,

1. That an Establishment to be called the Public Health Institute of Mysore be provided.
2. That this Institute be under a "Director".
3. That it include a chemical laboratory for public health and general analytical purposes, a Bacteriological Laboratory, a Sanitary School, Vaccine Factory and Museum.
4. That the Sanitary School be used to train Sanitary Inspectors, Junior Revenue, D.P.W. & Police officers, Sheikdars, & Schoolmasters.
5. That Dr. Sreenivasa Rao be the first Director, as he is undergoing training specially with that object in view.
6. That he be given a thoroughly qualified chemical assistant a graduate in Chemistry (already sanctioned) in addition to his laboratory assistant.
7. That the Vaccine Factory continue under the care of Mr. Abboy Naidu, generally supervised of course by the Directo
8. That the Director should reside on the premises.

2. Now with regard to the location of this Institute I propos in my official notes that the maternity Hospital, Bangalore City b utilised for the purpose, as it has often been condemned for the purposes of Maternity owing to the prevalence of Malaria in the vi vicinity, and that a new Maternity be constructed in the Fort on the site of the present Sanskrit School, but, for the present utilising the School as wards, and erecting, for the present also two new blocks, to be built in such a position as would secure their ~~fitting~~

their fitting in with the general arrangement of the new Maternity. Estimate of the approximate cost both of altering the Maternity to adapt it for the purposes of the Institute, and of building the -- new Maternity are already before His Highness's Government.

3. I think it was since writing the unofficial notes of which the above is a summary that the decision of Government to abolish the agricultural Chemist & his laboratory was made. On hearing of this decision I strongly represented to His Highness's Government the suitability of the Agricultural Chemist's laboratory & out --- houses at the cost of merely removing ae single wall for the pur -- poses of a Public Health Institute complete! To this proposal I have had nothing in the way of a definite reply, but it is my candid opinion that the said laboratory if given up for the purposes of the Agricultural Chemist, could be placed to no better use than that I have proposed, & for which it is prominently suitable.

4. If it should be the pleasure of His Highness's Gvernment to -- adopt this suggestion, the question of transferring the Maternity - to a new site might be deferred and efforts made to render the site of the present one healthy. But the desirability of transferring the Maternity to the vicinity of the Victoria and new Ophthalmic Hospitals should never be lost sight of. I am convinced that --- Bangalore will some day be a great centre of the medical education, and the desirability of having the hospitals together cannot be -- over estimated. The proposed site would also be very central, -- whereas the present one is about as eccentric as can be. In considering this point the direction in which the City is extending -- must not be lost sight of- a direction making the fort ever more -- & more central.

5. And should the Maternity be thus transferred is it at all like -ly the building it now occupies would go to ruins? I believe each of its three blocks could be let in a month as desirable residences Each would have a little garden in front, & a considerable enclosure with conservancy lane at the back, & with the necessary attention to the surroundings with a view to suppressing malaria residence there should be altogether delightful!

To
The Sanitary Commissioner,

Sir,

With reference to your letter (without number & date) forwarded through the Comptroller submitting for sanction a proposition statement for additional establishment costing Rs 381/- per mensem, for the public Health Institute, I am directed to suggest, for reasons as the following modifications, in the proposition statement as detailed below:- viz the proposals submitted by you

1 ~~Matron~~ One clerk on Rs 25/- per mensem

over.

SUBJECT.

(14)

In addition to the existing clerk on Rs 30/- per mensem, ~~may~~ sanction ~~be accorded~~ for the Public Health Laboratory instead of 3 additional clerks as proposed. ~~One clerk may be placed in charge of the Health Museum & Library instead of a~~ separate Curator on Rs. 50/- for the Museum and a librarian on Rs 30/- for the Library. ~~Seem unnecessary~~ (1)

2. ~~A~~ The necessity for a Mechanic on Rs 30/- for the refrigerating plant ~~does not seem necessary~~ is not clear.

3. ~~Note~~ The pay of the two additional Laboratory attendants may be fixed at Rs 15/- and Rs 10/- instead of Rs 20/- and Rs 15/- as proposed.

4. ~~Retain~~ Two attendants may suffice for the Library & Museum instead of three as proposed.

5. When the Laboratory attendants are increased from 4 to 6 as proposed, it ~~is not~~ does not seem necessary to increase the number of orderlies also

(1) * 1 Head clerk Rs 50/-
1 Typist Rs 40/-
1 clerk Rs 30/-

These two appointments may be held by one person and one more clerk for this purpose appears to be sufficient.

In reply to your No. 1140 Sany. 121-11-2 dated the 5th August 1912, I have the honor to submit as the last of the modifications the following viz.,

1 Head Clerk who will be the Accountant as well.	Rs. 50/-
1 Typist	Rs. 30/-
A Despatching clerk who will be the Record Keeper and Keeper of From and To Registers etc	Rs. 25/-
For the present and as an experimental measure an official on Rs. 50/- as the Curator and Librarian in lieu of a separate Curator and Librarian will do	Rs. 50/-
A mechanic is absolutely necessary as no Clerk or Typist could be entrusted with the delicate machinery of the refrigerating plant and without a trained machanic the work may come to a standstill any day.	Rs. 30/-

The pay of the two additional Laboratory Attendants to be kindly fixed at Rs. 15/- and 12/- at least.

Two attendants one for the Library and one for the museum will be tried for a time and if the work suffers one more will be indented for.

The duty of an orderly will be quite different from that of a Laboratory Attendant and so one more orderly at least in the place of two more asked for may be kindly granted.

The pay of the two Assistant Superintendents for the Vaccine Institute may be kindly fixed at Rs. 50/- and 35/- in lieu of Rs. 50/- and 30/-.

I have the honor to be,
Sir,

To

The Sanitary Commissioner

Sir,

With reference to your letter No 909 dated the 24th August 1913 submitting a revised proposal statement for the additional establishment required for the public Health Institute, I am directed to point out that the proposals made by you appear to be somewhat extravagant and to request you to be so good as to submit modified proposals

over.

To

K.R. Srinivasa Iyengar Esq., M.A.,
Secretary to the Government of His
Highness the Maharajah of Mysore,
General & Revenue Departments
BANGA

SIR,

In reply to your letter No. 3071 Sany. 121-12- dated the 30th August 1913, I have the honor to state that the additional Establishment proposed is the least compatible with efficiency. For the immediate present, however, - that is until new buildings for the Public Health Institute are constructed, - the staff required in connection with the Refrigerating plant, the Public Health Museum and the Public Health Library will not be needed. Consideration of the question of additional Establishment required for the Vaccine Institute may also be deferred. I consider the following as the minimum additional Establishment i-e one incapable of further reduction:

1 Head Clerk...	Rs. 50/-
1 T y p i s t	Rs. 30/-
2 Attendants one on Rs. 15/- and the other on Rs. 12/-	
1 Orderly	Rs. 8/-
1 Clerk on	Rs 25/-

2. With reference to para 2 of your letter, I

I presume Government have in view the scientific and educative portion of the work that will hereafter form part of the functions of the Public Health Institute. If this be so, I beg to invite reference to my letter No. 1007 dated the 30th August 1913 wherein I have sketched out a comprehensive programme of work for the Institute. The additional Establishment now applied for being mainly clerical and menial, it would be difficult to state in concrete terms the improved results that may be expected directly in consequence of its entertainment. The staff is necessary to cope with the additional clerical and menial work that will devolve on the Institute as a result of a very considerable enlargement of the scope of its functions.

I have the honor to be,
Sir,
Your most obedient servant,

J. J. Anderson

Sanitary Commissioner.

P.H.
